

## SNMP Card Information

Thank you for purchasing your Innovolt *Voltage Regulating UPS*! Due to lingering supply chain issues brought on by the global pandemic of 2020, Innovolt Voltage Regulating UPSs were shipped with one of two possible SNMP cards as show here:

**Innovolt OEM SNMP Card**

**MegaTec Aftermarket SNMP Card**

We have made a request for future Innovolt OEM SNMP Cards to be shipped with *DHCP Enabled*.

However, if you received your unit before this change is made, it will have a Static IP address as shown in the table below.

Both cards have similar capabilities, including a resident web server that allows access to a GUI to view status and set parameters including the default IP address. The two cards have different MIB files. The MIB files and Users Manuals for both cards can be found on the Innovolt website.

Note that the MegaTec most likely will be the first IP address listed but may be one of the others listed depending on its manufacturer date.

	<b>Innovolt OEM SNMP Card</b>	<b>MegaTec Aftermarket SNMP Card</b>
Default IP Address	192.168.102.230	192.168.0.156
		192.168.102.230
		192.168.0.177
Default Password	12345678	[enter] (no password)
